

Note:
Zone of Theoretical Visibility has been generated using Ordnance Survey Terrain 5 digital terrain model which does not take into account the screening effects of vegetation, buildings or other structures.

The ZTV is based upon a grid of points spaced 10m apart within the indicative areas of development. The development height has been assumed to be 56m above ground level, with an observer eye height of 1.7m.

The development areas are taken from drawings "West Plot Perimeter Boundary Immingham NH3 Terminal Immingham" and "East Plot Perimeter Boundary Immingham NH3 Terminal Immingham" by Air Products and Chemicals Inc.
